# Atlanta GULLY TRAP

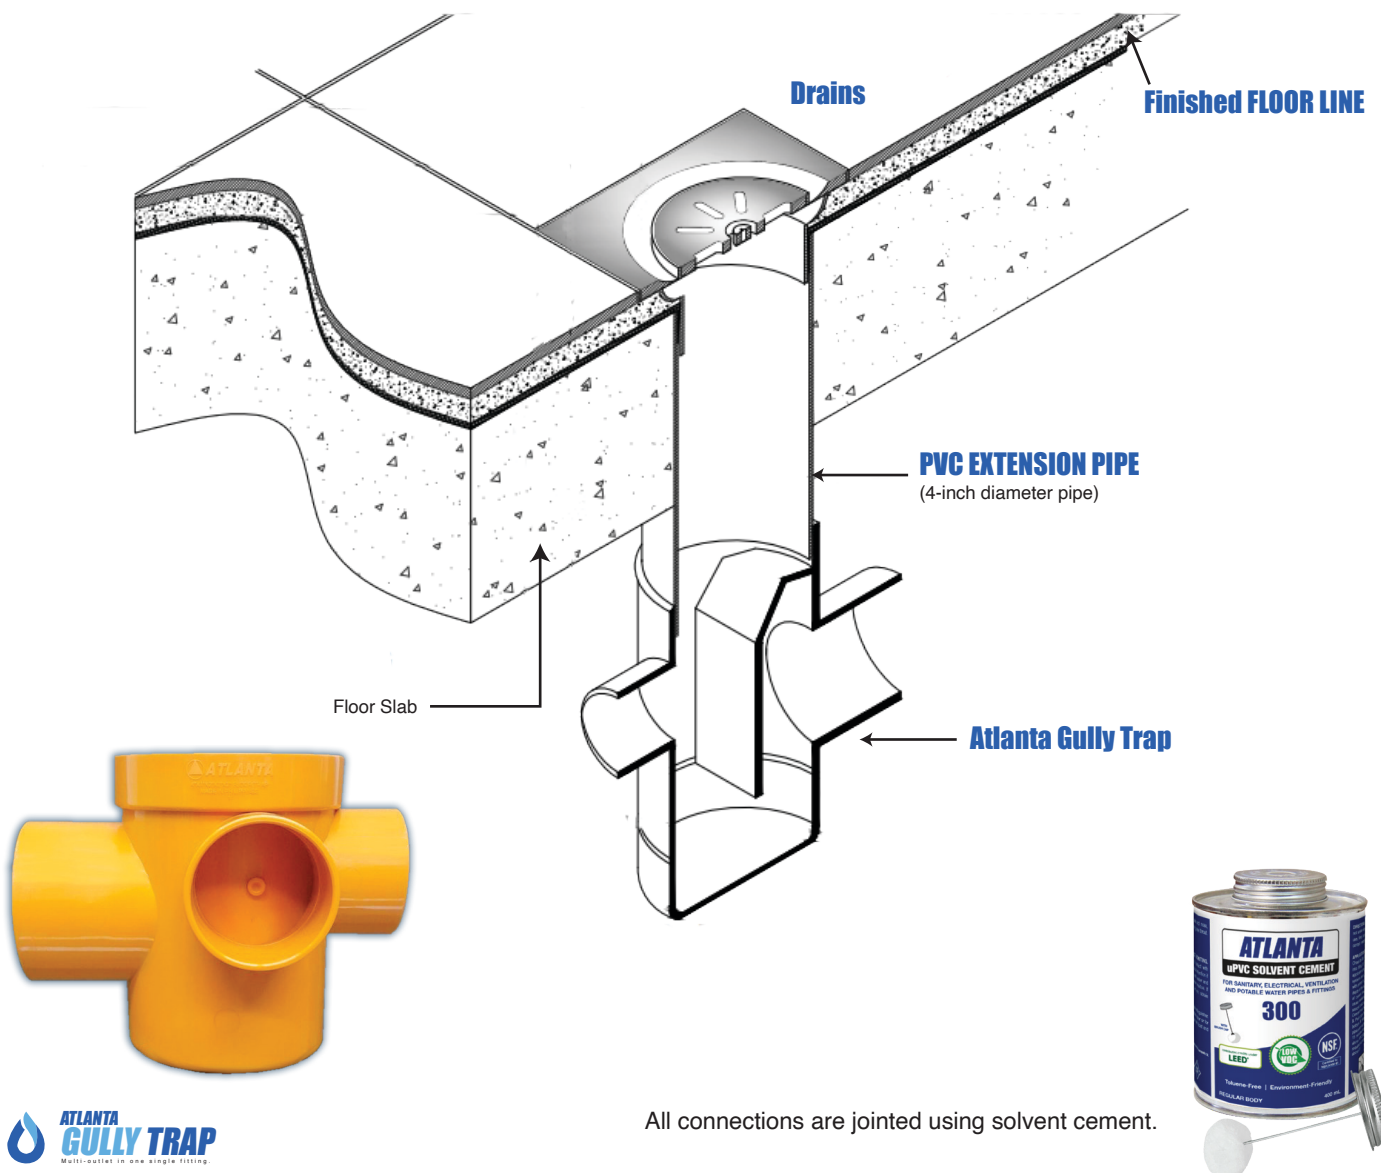

The Atlanta Gully Trap is a part of the sewage drainage system that receives run-off from our used lavatory, bathroom, and laundry drains before the said runoff enters the sewer system.

This all-in-one access for your drainage cleaning system makes this device simple to maintain. Instead of keeping up with numerous P traps, you would only need one Gully Trap.

The Atlanta Gully Trap permits the installation of waste systems in the suspended ceiling of the chamber below. Your drains are streamlined into one with this design, which can help you save time and money on additional installation costs. It also has a removable trap seal that is simple to clean and maintain.

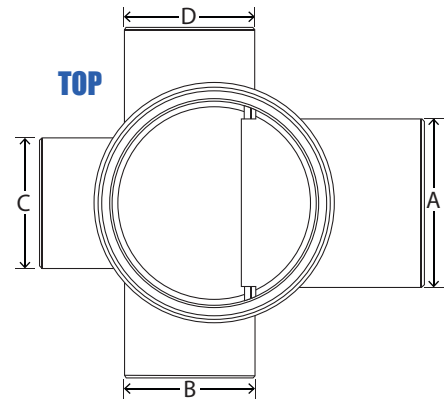

## Same floor maintenance.

Make it simple for your customers to take care of their houses. Atlanta Gully Trap makes it possible to maintain drainage inside your bathrooms rather than having to go to lower floors or the outside of your house.

## Comparison

ATLANTA GULLY TRAP	P-TRAP SYSTEM
Easy maintenance. • No need for coring when clogging	Coring is necessary to access the P-Trap when unclogging. • May be inconvenient the unit owner.
Minimal chance for trap to dry up due to large volume of water seal.	Water seal can easily dry up leading to foul smells that can be discharged to the unit.
Access panel will be eliminated since Atlanta Gully Trap is accessible to all fixtures maintenance.	Access panel is required for P-Trap maintenance.
Single vent for gully trap intended for all fixtures	Individual vent is required thus requiring more pipes
